Crash Data Retrieval Tool

CDR[®] Tool Version 23.3 Software

BOSCH
Invented for life

What's New for CDR Version 23.3?

The release of version 23.3 of the CDR software includes support for many new MY2022~2024 vehicles and EDR systems, worldwide. See the information below for additional new coverage and refer to the CDR help file section named *What's New in this Version?* for additional details about this release.

European General Safety Regulation - (EU) 2019/2144

- ▶ The following features were included to support the new GSR 2019/2144 regulation in Europe:
 - Automatic Retrieval of Vehicle Type, Variant and Version for late model Porsche vehicles sold in Europe
 - Last 6 digits of the user-entered VIN does not appear after imaging - prior to this release, the CDR software only removed the last 6 digits of the VIN after saving the CDR file. This meant that the user can still print the file with the VIN before the removal of the last digits. CDR software automatically saves the CDR file immediately after the imaging is complete.

CDR Next Generation (CDR2)

- ▶ CDR v23.3 installation program comes bundled with both CDR (Legacy) and CDR2

(Next Generation). Both Legacy and CDR2 are installed when *CDR23.3Setup.exe* installation program is executed.

*For further information about using the CDR2 application, refer to the document named *CDR2_Product_Information2.pdf*. This document located in the *CDR23.3Setup.zip* installation file.*

New Vehicle Coverage

- ▶ BMW/MINI vehicle support (all supported markets)
 - Added support for MY2024 BMW and MINI vehicles
- ▶ DS vehicle support (China/Europe)
 - Support was added for model years 2022~2023 vehicles for China market:
 - DS3, DS7 and DS9
 - Support was added for model year 2023 DS D3 for the European market
- ▶ Fiat (Europe)
 - Support was added for model year 2024 Fiat Ducato vehicles for the Europe market

The CDR2 application supports this vehicle. Refer to the CDR legacy help file and click on the link for CDR2 to open the CDR2 software
- ▶ General Motors (US/Canada, S. Korea)
 - Support was added for model year 2024 Chevrolet vehicles for the S. Korea market
 - Colorado, Bolt EUV, Equinox, Tahoe, Trailblazer, Traverse and TRAX

- Added support for model year 2024 Chevrolet TRAX
- ▶ Mazda (US/Canada, Europe)
 - Added support for model year 2024 vehicles for the Europe market
 - Mazda3 and CX-30
 - *CDR2 supports these vehicles. Refer to the CDR legacy help file and click on the link to CDR2 to open the CDR2 software*
 - Added support for model year 2024 CX-90 for the US/Canada markets
- ▶ Opel vehicle support (Europe)
 - Support was added for model year 2023 Opel Corsa
- ▶ Peugeot vehicle support (China/Europe)
 - Support was added for model years 2022~2023 vehicles for China market:
 - 308, 508, 2008, 3008 and 5008
 - Support was added for model year 2023 Peugeot vehicles for the European market
 - 208, 508 and 2008
- ▶ Porsche (Europe)

 - 2024 BRZ (US/CA)
 - 2024 Levorg (where sold)
 - 2024 WRX (where sold)
- ▶ Toyota (Japan)
 - Added support for MY2020 ~ 2021 Yaris ATIV *this vehicle uses the Daihatsu CDR cable and select Daihatsu brand for vehicle selection*

Minimum PC Hardware Requirements

To install and run the CDR software, your PC must meet the minimum hardware requirements listed below:

- Processor Speed: 2GHZ or faster
- RAM: 8GB or greater
- Disk Space: 500GB or greater
- Video Resolution: 1028x768 or better
- 2 open USB ports (one for CDR interface and the other for CDR 900 wireless setup & for use with CDR 500; both USB ports must be enabled to read USB mass storage devices)

Supported Operating Systems

This version of the CDR software is supported on Windows® 10/11 (32 & 64 bit) operating systems with the minimum version requirements:

- Windows® 11
- Windows® 10 - Win 10 build 1507 or later

IMPORTANT: Since Microsoft has stopped support for Windows 7 and 8.1, Bosch will no longer continue to support CDR on these operating systems.

Software Compatibility with CDR Devices

CANplus - This software version is compatible with the blue and green metal CDR interface modules marked with a CANplus logo on its label. Other versions of the CDR module (black plastic or blue units without the CANplus logo) is not supported and can cause the software not to function as intended.

CDR 900 - This software version is compatible with the Vehicle and Cable Lookup section, provides coverage information regarding CDR 900 supported vehicles.

CDR 500 - This software version is compatible with all for determining which vehicles require the CDR 500 for downloading data from vehicles equipped with ACMs with FlexRay communication.

Is Your CDR System Hardware Up to Date?

To take full advantage of this new software version, you need to obtain the new CDR Cables released up through CDR Version 23.3. You also need to make sure your CDR hardware is up to date. If your CDR Tool has not been updated recently, refer to the Checklist for v23.3 which can be found on the Bosch Diagnostics CDR website located at <https://cdr.boschdiagnostics.com/cdr/>.

Contact your CDR tool distributor if you have any questions about the CDR products or need to order new hardware or a software subscription.
