Crash Data Retrieval Tool

CDR[®] Tool Version 24.2 Software

BOSCH
Invented for life

What's New for CDR Version 24.2?

The release of version 24.2 of the CDR software includes support for many new MY2024-2025 vehicles and EDR systems, worldwide. See the information below for additional new coverage and refer to the CDR help file section named *What's New in this Version?* for additional details about this release.

General

- ▶ Due to the increased complexity and amount of data recovered in upcoming EDR systems, minimum Personal Computer RAM requirements were updated from 4 to 8 GB

Added China UDR Coverage for the CDR2 Application

- ▶ Added brand specific China UDR coverage to CDR2 for BMW and Skoda vehicles

CDR Next Generation Application (CDR2)

- ▶ CDR v24.2 installation program comes bundled with both CDR (Legacy) and CDR2 (Next Generation software). Both Legacy and CDR2 are installed when *CDR24.2Setup.exe* installation program is executed.

For further information about using the CDR2 application, refer to the document named: CDR2_Product_Information3.pdf. - this document is zipped into CDR24.2Setup.zip installation file.

Added New CANplus Back-model Coverage for CDR 900

- ▶ Added CANplus back-model year coverage to CDR 900 for the following vehicles:
 - Dodge PPM Module 2012 through 2017
 - Lancia PPM Module 2012 through 2015
 - Ford and Lincoln 2009 through 2025

Minimum PC Hardware Requirements

To install and run the CDR software, your PC must meet the minimum hardware requirements listed below:

- Processor Speed: 2GHZ or faster
- RAM: 4GB or greater
- Free Disk Space: 8GB or greater
- Video Resolution: 1028x768 or better
- 2 open USB ports (one for CDR interface and the other for CDR 900 wireless setup & for use with CDR 500; both USB ports must be enabled to read USB mass storage devices)

Supported Operating Systems

This version of the CDR software is supported on Windows® 10/11 (64 bit) operating systems with the minimum version requirements:

- Windows® 11
- Windows® 10 - Win 10 build 1507 or later

IMPORTANT: Since Microsoft has stopped support for Windows 7 and 8.1, Bosch will no longer continue to support CDR on these operating systems.

Software Compatibility with CDR Devices

CDR 900 - This software version is compatible with the Vehicle and Cable Lookup section, provides coverage information regarding CDR 900 supported vehicles.

CDR 500 - This software version is compatible with all CDR 500 units in the field.

CANplus – The CANplus device is no longer sold through CDR Tool distributors. Bosch continues to support devices in the field and can be used on vehicles as defined in the CDR help file.

Is Your CDR System Hardware Up to Date?

To take full advantage of this new software version, you need to obtain the new CDR Cables released up through CDR Version 23.3. You also need to make sure your CDR hardware is up to date. If your CDR Tool has not been updated recently, refer to the Checklist for v23.3 which can be found on the Bosch Diagnostics CDR website located at <https://cdr.boschdiagnostics.com/cdr/>.

Contact your CDR tool distributor if you have any questions about the CDR products or need to order new hardware or a software subscription.
