CDR® System Version 6.0 Software and Hardware

**BOSCH**  
Invented for life

Bosch is pleased to announce CDR version 6.0 will support many Nissan and Infiniti vehicles for model year 2013 sold into the US and Canada markets. In addition, Bosch has dramatically expanded coverage for model year 2012 Honda and Acura vehicles, as well as added support for 2013 models for other OEMs. The highlights of the software and hardware changes for 6.0 are listed below. For details on specific vehicle and system coverage, please refer to the *List of Supported Vehicles in CDR v6.0* which can be accessed from the Bosch Diagnostics website at <http://www.boschdiagnostics.com/testequipment6/CDR/pages/CDRHome.aspx>.

### What's New for CDR Version 6.0?

- Toyota Sequoia
- Toyota Sienna
- Toyota Tacoma
- Toyota Tundra
- Toyota Venza
- Toyota Yaris

### 6.0 CDR Hardware Changes

New for version 6.0, are two CDR cables which are now available for ordering. These cables are needed for direct-to-module imaging on select 2013 Chrysler and Nissan branded vehicles. At this time, these new cables are not included in the CDR D2M Cable Kit (F00K08728). Be sure to place your order for these new cables separately when purchasing a CDR Tool.

#### ► F00K108780 - Nissan CDR Cable

This new CDR cable enables direct-to-module imaging on supported MY2013 Nissan and Infiniti vehicles.

#### ► F00K108785 - Chrysler CDR Cable

This new CDR cable enables direct-to-module imaging on some newly added select MY2013 Chrysler brand vehicles.

### Minimum PC Hardware Requirements

In order to install and run the CDR software, your PC must meet the minimum hardware requirements listed below:

- Processor Speed: 1GHZ or faster
- RAM: 256MB or more
- Disk Space: 100MB or more
- Video Resolution: 1028 x 768 or higher

### Supported Operating Systems

This version of CDR software is currently supported on the following US Windows® operating systems:

- Windows XP® (Home and Pro for PCs, 32 & 64 bit)
- Windows Vista® (32 & 64 bit)
- Windows 7® (32 & 64 bit)

### Software Compatibility with the CDR Interface Module

This software version is compatible only with the blue and

green metal CDR interface module marked with a CAN plus logo on its label. Other versions of the CDR module (black plastic or blue units without the CAN plus logo) are not supported and can cause the software not to function as intended. To purchase a current CDR Interface Module (P/N: F00K108230), please contact Bosch Sales Support at: 1-800-321-4889 ext. 9241 or contact Crash Data Group at 1-800-280-7940.

### Is Your CDR System Hardware Up to Date?

To take full advantage of this new software version, you not only need to obtain the new CDR Cables released for CDR version 6.0, you also need to make sure your hardware is up to date through version 6.0 as well. If your CDR Tool has not been updated recently, refer to the *Checklist for v6.0* which can be found on the Bosch Diagnostics CDR website located at <http://www.boschdiagnostics.com/testequipment/CDR/Pages/CDRHome.aspx>. Contact Bosch Sales and Support if you have any questions about the CDR products or you need to order new hardware or a software subscription.
