

Bosch Cylinder Contribution Application

for Bosch Mastertech VCI

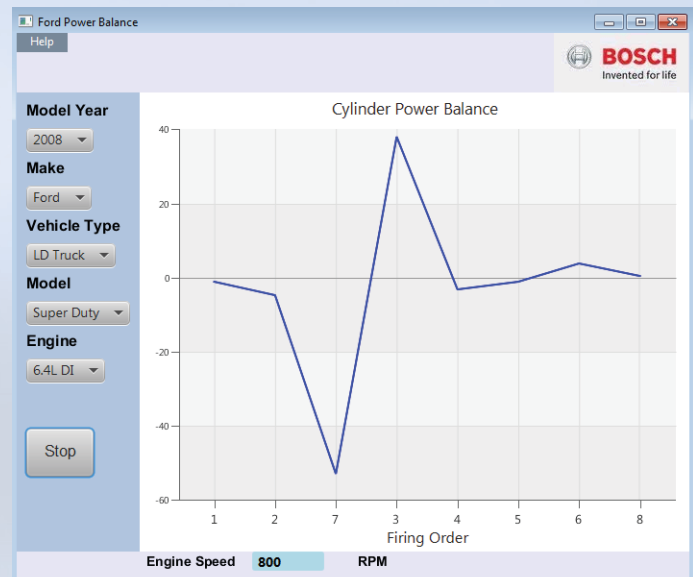

BOSCH
Invented for life

Powerful standalone application to do power balance for Ford vehicles

Balancing at your finger tips

Perform serial data based “power balance” functionality for ALL CAN based Ford, Lincoln, Mazda and Mercury vehicles from model year 2003 to 2013*

Just install the application on a PC which has M-VCI software, start power balancing with the Bosch Mastertech VCI**

Application worth \$100!

Available for Free for Bosch Mastertech VCI customers.
Just download from website and use it!

How to download the application:

<http://www.boschdiagnostics.com/dsoftware/Cylinder-Contrib-Setup.exe>

Features and Advantages:

- ▶ Supports wide range of vehicles
- ▶ Stand alone application
- ▶ Automatically selects attributes such as cylinders, firing order etc based on vehicle selection
- ▶ Runs on Windows XP, Vista, 7 and 8

* The exception is a few 2003 vehicles which still run J-1850 (not CAN) which is not supported

** M-VCI software version 12.4.6 or higher is needed
